Subject: FW: Information on the WV Charleston Chemical Spill sampling data

I just learned about online data. See the info below. The dhsem site is very useful, but you must wait for the image of the glass of water to pop up and then click on it.

Sampling data is available on-line, on the West Virginia Division of Homeland Security and Emergency Management webpage. The link is:

www.dhsem.wv.gov/Pages/WV-American-Water-Emergency.aspx

If the link doesn't work, go to the www.dhsem.wv.gov homepage and click on the glass of water image that says "Water Do Not Use Emergency." You may have to wait for the image to pop up.

Don't click on the red text box above it that says WV America Water Kanawha Valley Customers." That will take you to the water company's site.

The WV Homeland Security webpage has a lot of information and documents related to the chemical spill, including flushing guidelines, sampling data, health advisories, and more.
